The Proginov ERP system is a comprehensive management software suite for construction professionals.

STRUCTURAL WORKS

The Proginov ERP system lets you monitor and control your construction sites in real time to optimise your costs and margins in the short, medium and long term.

FINISHING WORKS

It's easy to manage finishing works such as plumbing or electricity thanks to the numerous customised business settings.

For each activity, Proginov provides the best solution for your needs through continuous dialogue with our staff and business project managers.

Civil engineering, roads and services

For companies that perform structural works and need to track activities by site or by job.

- // Invitation to tender management
- // Construction site analysis
- // HR and equipment planning
- // Equipment maintenance
- // Tenders submitted with Edisys Spigao

Electricity, air conditioning, plumbing

For companies that perform finishing works and design systems with numerous assemblies and supplies.

- // Updated item catalogue
- // Costing tool
- // After-sales Service
- // Workforce report

Industrial joinery

For companies that design and manufacture customised products in small and medium runs.

- // Product configurator with 2D rendering
- // Production management (CAPM)
- // Optimised cutting
- // Numerically-controlled machine interface

Quarries and sand pits

For extraction sites that want to simplify and automate the weighing and delivery of materials.

- // Mining site management
- // Transport management
- // Delivery schedule monitoring
- // Weighbridge interface

Precast concrete

For companies in the sector that make custom products and want to optimise their production and cost price.

- // Manufacture of custom products
- // BOMs and routings
- // Time management
- // Drying time
