The Proginov ERP system is a comprehensive management and production solution. It addresses the problems of the timber industry, from import to processing.

Improve your management
Proginov is here to support you in the day-to-day running of your company. From import to processing, supplier to consumer, the PROGINOV ERP system manages all of the complexities of the timber industry, including management of multiple processing streams, guaranteeing yield traceability.

Proginov's solution can be used to:
- **Monitor** fluctuations in product cost price
- **Obtain** reliable indicators that can be used in real time
- **Keep** inventory to a minimum
- **Share** and process data faster
- **Reduce** lead-times
- **Automate** tasks and reduce the risk of errors
- **Structure** your IT system

By optimising this part of your job, you can:
- **Satisfy** your customers and constantly adapt to their needs
- **Anticipate** market fluctuations
- **Expand** your sales
- **Increase** the productivity of your teams
- **Manage** your business in real time
- **Increase** your company's profitability
